Volume 26, Issue Nos. 1–15

International Journal for

NUMERICAL AND ANALYTICAL METHODS
IN GEOMECHANICS

Issue No. 1, January 2002

Coupled damage and plasticity modelling in transient dynamic analysis of concrete: F. Gatuingt and G. Pijaudier-Cabot 1

Analysis of undrained cavity expansion in elasto-plastic soils with non-linear elasticity: L. F. Cao, C. I. Teh and M.-F. Chang 25

Numerical modelling of fluid flow in microscopic images of granular materials: E. Masad, B. Muhunthan and C. Crowe 53

Effect of property variation and modelling on convection in a fluid overlying a porous layer: B. Straughan 75

Issue No. 2, February 2002

Computational mechanics of the steel-concrete interface: M. R. Ben Romdhane and F.-J. Ulm 99

A visco-plastic constitutive model for granular soils modified according to non-local and gradient approaches: C. di Prisco, S. Imposimato and E. C. Aifantis 121

Numerical solution for consolidation and desiccation of soft soils: D. T. C. Yao, W. L. de Oliveira-Filho, X.-C. Cai and D. Znidarcic 139

Efficient conditional modeling for geotechnical uncertainty evaluation: A. J. Graettinger, J. Lee and H. W. Reeves 163

Upper bound limit analysis using linear finite elements and non-linear programming: A. V. Lyamin and S. W. Sloan 181

Issue No. 3, March 2002

Three-dimensional finite element analysis of the interaction between tunneling and pile foundations: H. Mroueh and I. Shahrour 217

Explicit solutions for the instantaneous undrained contraction of hollow cylinders and spheres in porous elastoplastic medium: A. Giraud, F. Homand and V. Labiouse . 231

Integration and calibration of a plasticity model for granular materials: L. Jacobsson and K. Runesson 259

Image-based modelling and analysis of microstructures for two-scale problems in geomechanics: K. Terada, T. Kyoya , M. Kazama, K. Lee and L. Oyang 273

Fundamental solutions for a fluid-saturated, transversely isotropic, poroelastic solid: I. Taguchi and M. Kurashige 299

Issue No. 4, 10 April 2002

Drained cavity expansion in sands exhibiting particle crushing: A. R. Russell and N. Khalili 323

Performance of Jacobi preconditioning in Krylov subspace solution of finite element equations: F.-H. Lee, K. K. Phoon, K. C. Lim and S. H. Chan 341

Source signature and elastic waves in a half-space under a sustainable line-concentrated impulsive normal force: M. Ziv 373

Failure criteria of anisotropically damaged materials based on the critical plane concept: Z. Mróz and J. Maciejewski 407

Issue No. 5, 25 April 2002

Microstructural deformation mechanisms of unsaturated granular soils: J. A. Gili and E. E. Alonso 433

A shear-dilation-based model for evaluation of hydraulically stimulated naturally fractured reservoirs: M. K. Rahman, M. M. Hossain and S. S. Rahman 469

A fractal comminution approach to evaluate the drilling energy dissipation: A. Carpinteri and N. Pugno 499

Constitutive modelling of aggregate interlock in concrete: A. D. Jefferson 515

Issue No. 6, May 2002

Modelling of hygro-thermal behaviour and damage of concrete at temperature above the critical point of water: D. Gawin, F. Pesavento and B. A. Schrefler 537

Instability of wave propagation in saturated poroelastoplastic media: X. Li, J. Zhang and H. Zhang 563

Self-similar solution of a plane-strain fracture driven by a power-law fluid: J. I. Adachi and E. Detournay 579

Dynamic interaction between the soil and an anchored sheet pile during seismic excitation: G. Degrande, E. Praet, B. Van Zegbroeck and P. Van Marcke 605

Simulating the collapse of unsaturated soil by DEM: S. H. Liu and D. A. Sun 633

Issue No. 7, June 2002

Incrementalization of a single hardening constitutive model for frictional materials: P. V. Lade and K. P. Jakobsen 647

Implementation algorithm for a single hardening constitutive model for frictional materials: K. P. Jakobsen and P. V. Lade 661

Solute transport through a deforming porous medium: G. P. Peters and D. W. Smith 683

A constitutive model for crushed salt: S. Olivella and A. Gens 719

Issue No. 8, July 2002

Three-dimensional analysis of single pile response to lateral soil movements: J. L. Pan, A. T. C. Goh, K. S. Wong and A. R. Selby 747

Modelling of elastoplastic damage in concrete due to desiccation shrinkage: F. Bourgeois, N. Burlion and J. F. Shao 759

Probabilistic analysis of underground pillar stability: D. V. Griffiths, G. A. Fenton and C. B. Lemons 775

Simulation of localization failure with strain-gradient-enhanced damage mechanics: W. Zhou, J. Zhao, Y. Liu and Q. Yang 793

Identification of non-linear stress-strain-time relationship of soils using genetic algorithm: X.-T. Feng, S. Li, H. Liao and C. Yang 815

Micromechanics of saturated and unsaturated porous media: X. Chateau and L. Dormieux 831

Issue No. 9, 10 August 2002

Evolution of elastic properties in finite poroplasticity and finite element analysis: D. Bernaud, V. Deudé, L. Dormieux, S. Maghous and D. P. Schmitt 845

Characterization and reconstruction of a rock fracture surface by geostatistics: A. Marache, J. Riss, S. Gentier and J.-P. Chilès 873

Mechanical behaviour of Lixhe chalk partly saturated by oil and water: experiment and modelling: F. Collin, Y. J. Cui, C. Schroeder and R. Charlier 897

Issue No. 10, 25 August 2002

Tensor visualizations in computational geomechanics: B. Jeremić, G. Scheuermann, J. Frey, Z. Yang, B. Hamann, K. I. Joy and H. Hagen 925

Modelling of anisotropic damage in brittle rocks under compression dominated stresses: Y. F. Lu and J. F. Shao 945

A Generalized Backward Euler algorithm for the numerical integration of an isotropic hardening elastoplastic model for mechanical and chemical degradation of bonded geomaterials: C. Tamagnini, R. Castellanza and R. Nova 963

Fuzzy parameters analysis of time-dependent fracture of concrete dam models: F. Barpi and S. Valente 1005

Book review: T. Hueckel 1029

Issue No. 11, September 2002

Semi-analytical elastostatic analysis of unbounded two-dimensional domains: A. J. Deeks and J. P. Wolf 1031

A unified approach to the implicit integration of standard, non-standard and viscous plasticity models: R. de Borst and O. M. Heeres 1059

A 2-D constitutive model for cyclic interface behaviour: G. Mortara, M. Boulon and V. N. Ghionna 1071

Evaluation of a constitutive model for clays and sands: Part I – sand behaviour: J. M. Pestana, A. J. Whittle and L. A. Salvati 1097

Evaluation of a constitutive model for clays and sands: Part II – clay behaviour: J. M. Pestana, A. J. Whittle and A. Gens 1123

Issue No. 12, October 2002

A study of ground-structure interaction in dynamic plate load testing: B. B. Guzina and S. Nintcheu Fata 1147

Micromechanical modelling of monotonic drained and undrained shear behaviour of granular media using three-dimensional DEM: T. G. Sitharam, S. V. Dinesh and N. Shimizu 1167

Parameter identification for lined tunnels in a viscoplastic medium: B. Lecampion, A. Constantinescu and D. Nguyen Minh 1191

Consistent tangent operators for constitutive rate equations: W. Fellin and A. Ostermann 1213

A complex variable solution for a deforming buoyant tunnel in a heavy elastic half-plane: O. E. Strack and A. Verruijt 1235

Issue No. 13, November 2002

Numerical simulation of the fracture process in cutting heterogeneous brittle material: H. Y. Liu, S. Q. Kou and P.-A. Lindqvist 1253

Transient deformation of a poroelastic channel bed: P. C. Hsieh, W. P. Shih and L. H. Huang 1279

Mode I crack propagation in concrete under fatigue: microscopic observations and modelling: A. Toumi and A. Bascoul 1299

A theoretical framework for constructing elastic/plastic constitutive models of triaxial tests: I. F. Collins and T. Hilder 1313

A simplified analysis method for piled raft and pile group foundations with batter piles: P. Kitiyodom and T. Matsumoto 1349

Issue No. 14, 10 December 2002

Direct, partitioned and projected solution to finite element consolidation models: G. Gambolati, G. Pini and M. Ferronato 1371

Numerical analysis of pile behaviour under lateral loads in layered elastic–plastic soils: Z. Yang and B. Jeremić 1385

Template elastic–plastic computations in geomechanics: B. Jeremić and Z. Yang . . 1407

Analytical and numerical investigation of uniqueness and localization in saturated porous media: H. W. Zhang and B. A. Schrefler 1429

Elastic solutions for stresses in a transversely isotropic half-space subjected to three-dimensional buried parabolic rectangular loads: C.-D. Wang and J.-J. Liao 1449

Analysis of steady-state heat transfer through mid-crustal vertical cracks with upward throughflow in hydrothermal systems: C. Zhao, B. E. Hobbs, H. B. Mühlhaus, A. Ord and G. Lin 1477

Issue No. 15, 25 December 2002

Visual framework for development and use of constitutive models: Y. M. A. Hashash, D. C. Wotring, J. I.-C. Yao, J.-S. Lee and Q. Fu 1493

The point-estimate method with large numbers of variables: J. T. Christian and G. B. Baecher 1515

A constitutive model for granular materials with grain crushing and its application to a pyroclastic soil: M. Cecconi, A. DeSimone, C. Tamagnini and G. M. B. Viggiani 1531

Comments on use of the Barcelona Basic Model for unsaturated soils: S. J. Wheeler, D. Gallipoli and M. Karstunen 1561

Explicit limit equilibrium solution for slope stability: D. Y. Zhu and C. F. Lee 1573
